3D LEVEL MEASUREMENT OF COAL AND FLY ASH
BinMaster's 3D LevelScanner measures the level of coal and fly ash in bins, silos, and hoppers. Acoustics-based technology penetrates dust and requires minimal maintenance and no air purge. One or more sensors continuously measure and report multiple points on irregular horizontal surfaces to ensure high volume accuracy. Optional 3D visualization of bin contents allows plant and location of high and low points. Details by ash levels in ESP hoppers to optimize emptying cycles and ensure long plant life. MultiVision software allows you to view and manage inventory for all your vessels from a PC on a single screen.
