

## Company Profile

Bionomic Industries core business is design and manufacture of superior performance, high quality, value-added systems that are designed to provide years of reliable, trouble-free service for all of your clean air, product, and heat recovery application requirements. From initial inquiry and on-site evaluation through engineering design, manufacture, installation, and start up, Bionomic partners with its customers every step of the way to ensure pollution problems and compliance issues are completely solved or applicable waste energy or product recovery goals are fully satisfied.

As an industry leader in conventional and advanced gas cleaning and recovery technologies for more than 35 years, our experience and know how

has solved hundreds of different applications that are field proven in over 1,000 successful installations worldwide. A visit to our website at [www.bionomicind.com](http://www.bionomicind.com) will allow you to identify and select the right products for your application, from a complete line of wet and dry scrubbers, adsorbers, dry collectors, electrostatic devices, mist elimination vessels, NOx control chemistry, product recovery and by-product production systems, direct contact heat exchangers, air strippers, full accessories, and completely engineered turnkey systems.

At Bionomic Industries, you'll find the best products for your industry and application to comply with and meet PM 10 and 2.5 particulate standards, opacity requirements, control odors and mists, abate hundreds of hazardous toxic compounds from processing and production operations, combustion sources and waste treatment, and economically reduce abatement costs through product recovery of specific compounds, or save energy through waste heat recovery from a multitude of hot gas sources... and much more.

As your Clean Air, Product and Heat Recovery Solutions Partner, Bionomic Industries has a simple mission – to provide complete, high quality, long-lasting timely solutions to meet your most demanding application and project requirements.
